

IT SUPPORT FOR OMAHA NONPROFITS

IT for nonprofits

Volunteers, shared computers, donated equipment and several sites can stretch a small staff. **We help your technology earn its place in the budget, with a plan the people approving it can follow.**

- Cambium Data is Navy veteran-owned. Serving Omaha businesses since 2009.
- Owner Tony Underwood has over three decades of experience in IT.

Get the right Microsoft 365 nonprofit licenses

Microsoft offers eligible nonprofits up to 300 granted (donated) Microsoft 365 Business Basic licenses, plus discounts of up to 75 percent on paid plans such as Business Standard and Business Premium. Microsoft decides who is eligible and changes these offers from time to time, so we check the current terms before we recommend anything. The old free Business Premium grant was discontinued in 2025, so if nobody has looked at your licensing since then, it is worth checking.

- ✓ We help you register with Microsoft's nonprofit program.
- ✓ We pick the right mix of granted and discounted licenses for each role.
- ✓ We move users between plans without losing mail or files.
- ✓ We clean up accounts when people leave.

WHAT COMES OFF YOUR PLATE

Access, equipment and planning

Volunteer access, planned on purpose

Volunteers get individual accounts where it matters, access limited to what each role needs, and a clear rule for when accounts get turned off.

Shared computers locked down

Front desk, kiosk and classroom computers are locked down so one person's session cannot expose the next person's files.

A simple checklist

A short onboarding and offboarding checklist means access is added and removed the same way every time.

An honest look at donations

Regular Windows 10 support ended in October 2025. We tell you which donated PCs are worth setting up and which would cost more in staff time than they save.

A plan your board can budget for

A hardware lifecycle report and replacement plan replace emergency purchases, and written quotes help with grant requests and budget meetings.

Networks across your sites

Meraki makes it practical to run several small sites from one dashboard, with guest Wi-Fi, cloud-based phones, business internet and cameras.

AI employees that give your staff time back for the mission

AI employees take repetitive office work off your staff, like donor thank-you drafts, volunteer reminders and follow-ups, gathering documents for grant deadlines, and sorting the shared inbox. Your team gets more done without adding headcount, and your people approve anything that goes out. We also write a plain-language AI use policy so staff know which AI tools are approved and that donor, client and payment information never goes into them.

Protecting donor and client data

Donor records, payment details and information about the people you serve are exactly what attackers go after, and a small staff does not eliminate the risk. We also secure the accounts that log into your donor database and keep exports off unprotected laptops.

- ✓ Multi-factor authentication on email, remote access, and your donor database where it is supported.
- ✓ Endpoint protection on every computer, and encrypted laptops for staff who work from home or in the field.
- ✓ Email filtering, plus a rule that any change to payment or bank details gets confirmed by phone before anyone acts on it.
- ✓ Backups of Microsoft 365 and shared files, with test restores.
- ✓ Removing access promptly when staff and volunteers leave.

HOW WE WORK

Fully managed, co-managed, or hourly

If you only need occasional help, we also offer hourly support. Pricing depends on how many staff and sites you have and what is already in place, so we quote after the free review.

FULLY MANAGED

We become your IT

Fully managed IT covers the help desk, monitoring, patching, Microsoft 365 licensing and account cleanup, backups, donated hardware checks and lifecycle planning.

CO-MANAGED

Help with the rest

If someone already handles part of your technology, we take the rest. Our co-managed plan includes 0.25 support hours per user per month, with additional time billed in 15-minute increments. There is a minimum billing of 10 users.

Why Cambium

One local team

One Omaha team handles your IT, network, phones, internet, cameras, security and AI.

Plans you can defend

Our written quotes and equipment plans can go to your board and into grant requests.

Posted pricing

Our managed IT pricing is posted right on our site.

Local since 2009

Not sure where to start?

Start with a free technology and AI review. We look at your setup and show you what is not protected and what we would fix first, in plain English. For nonprofits, we also compare your Microsoft 365 licensing with Microsoft's current nonprofit offers.
