

— BUSINESS NETWORK SUPPORT IN OMAHA

Network support and Wi-Fi

Firewalls, switches, Wi-Fi and remote access, designed, installed and supported by a local team. **When the network works, nobody notices it, and that is the goal.**

- Cambium Data is Navy veteran-owned. Serving Omaha businesses since 2009.
- Owner Tony Underwood has over three decades of experience in IT.

— TWO WAYS TO WORK WITH US

Ongoing support, or a project when you need one

WITH MANAGED IT

Ongoing network support

We handle monitoring, updates and changes, and you get one local number to call when you need help. Ongoing network support comes with our managed IT.

NO CONTRACT NEEDED

Project work when you need it

Network refreshes, office moves, Wi-Fi upgrades, Cisco and Meraki hardware, business internet and phone systems can all be done as projects. Without managed IT, network work is quoted as a project or hardware job.

— WHAT COMES OFF YOUR PLATE

What we set up and support

Business network support covers the equipment that connects your office, so your staff is not stuck troubleshooting the Wi-Fi or the closet.

Firewalls

The firewall sits between your office and the internet. We set it up, help maintain the rules and keep it updated.

Switches and wiring

We install, label and document the gear in your network closet that connects computers, printers and phones.

Office Wi-Fi

We design coverage around your office, set up a separate guest network for visitors, and fix the spots where the signal drops.

Cabling

We plan and deliver cabling projects, so jacks end up where your desks actually are, and we test the equipment once the cable is in.

VPN and remote access

Your staff gets a secure way to reach office files and systems from home or on the road, without leaving the office network open to the internet.

Network monitoring

We monitor your firewall, switches and Wi-Fi and install updates to help catch problems early.

✓ Current clients can reach support at (402) 514-3210. If you are new to Cambium, call (402) 514-3200.

Related services from the same team

Business phone systems

We set up cloud-based phone systems, move offices off old ones and handle one-time installs, and we check what affects call quality.

Business internet

We quote and order business internet and backup lines, coordinate the install with the carrier, and set up the firewall on our end.

Cisco and Meraki

We sell and support Cisco and Meraki switches, firewalls and Wi-Fi, including licensing and renewals.

Security cameras

We install and support security cameras so you can look back at recordings when you need to.

Infrastructure projects

We handle network refreshes, office moves, Wi-Fi upgrades and server or firewall replacements.

Hardware as a service

You can get network gear, PCs and servers for a monthly cost, set up and managed with the rest of your IT.

HOW WE WORK

How a network project works

1

Walkthrough

We look at what you have today, where people sit, and what is not working.

2

Plan and quote

We explain what we would put in, where it goes, and what it costs, in plain English.

3

Installation

We schedule the work around your business day and test everything before we call it done.

4

Documentation

You get a written record of your network, so the answers are not stuck in one person's head.

5

Support after

Keep us on for support with managed IT, or take the documentation and run with it.

A solid network comes first

When your only internet line drops, email, phones and anything in the cloud can go with it.

- ✓ A backup internet line can take over when the main one fails.
- ✓ Cameras are kept on their own part of the network.
- ✓ Remote access does not leave the office network open to the internet.
- ✓ Firewalls, updates and remote access all tie into our cybersecurity work.

Why Cambium

One local team

One Omaha team handles your IT, network, phones, internet, cameras and security.

No contract needed

You do not need a managed IT contract to hire us for a project or buy hardware.

Straight answers

If something is old or unsupported, we tell you and explain why, and you decide what to replace.

Local since 2009

Serving Omaha businesses since 2009. Owner Tony Underwood has over three decades of experience in IT.

Not sure what your network needs?

Start with a free technology and AI review. We look at your setup, show you what is not protected, and point out where AI employees could take repetitive work off your staff. It is free, and you keep the written summary.
